China, January 2020

 THE **LINUX** FOUNDATION

 **LF AI**

Open source dominates AI

30+K developers

9 universities

10 licenses

China holds the second largest number
of open source AI projects

Open source AI Projects founded in China

 AdvBox AdvBox Baidu ★ 665 MCAp: \$40.32B	 Alibaba Alink Alink Alibaba Group ★ 1,744 MCAp: \$528.78B	 Cyclone Caicloud ★ 845 Funding: \$7.3M	 FedAI Ecosystem FATE WeBank ★ 1,191 Funding: \$182.79M	 GNES Generic Neural Elastic Search Tencent Holdings ★ 922 MCAp: \$419.33B
Kashgari Kashgari ★ 1,297 Kashgari Open Source Project	 Milvus ZILLIZ ★ 2,292 Funding: \$10M	 ncnn Tencent Holdings ★ 7,830 MCAp: \$419.33B	 PaddlePaddle Baidu ★ 10,418 MCAp: \$40.32B	 SQLFlow Alibaba Group ★ 3,424 MCAp: \$528.78B
 VEARCH VEARCH JD.com ★ 398 MCAp: \$55.47B	 VOLCANO Kubernetes Native Batch System Huawei Technologies ★ 674	 Alibaba.com X-DeepLearning X-DeepLearning Alibaba Group ★ 3,097 MCAp: \$528.78B	 xLearn xLearn Open Source Project ★ 2,582	 ADLINK ADLINK LF Artificial Intelligence Foundation ★ 31

 ADLINK ADLINK LF Artificial Intelligence Foundation ★ 31	 Angel Angel-ML LF Artificial Intelligence Foundation ★ 5,512	 EDL Elastic Deep Learning LF Artificial Intelligence Foundation ★ 51

Hosted in LF AI

**Scheduled for
TAC vote
01/16/2020**

We all are aware of the advantages of open source...

**Access to
source code**

**Ability to
customize**

**Rapid
development**

Peer review

**Improved
quality and
security**

**Reduce dev
time and TTM**

**Flexible
licensing model**

**Community
driven
innovation**

**Influence
roadmap via
participation**

**Transparent
technical
discussions**

But, Open Source offers *unique* benefits to AI

Fairness

Methods to detect and mitigate bias in datasets and models, including bias against known protected populations

Robustness

Methods to detect alterations/tampering with datasets and models, including alterations from known adversarial attacks

Explainability

Methods to enhance understandability and interpretability by persona/roles in process of AI model outcomes/decision recommendations, including ranking and debating results and decision options

Lineage

Methods to ensure provenance of datasets and AI models, including reproducibility of generated datasets and AI models

Open Data

Methods to clean, sort, tag and track provenance and a governance structure for doing these things

Open Source AI Ecosystem - Challenges

How is LF AI addressing these challenges?

Neutral Environment

Provide a neutral environment and an open governance that fosters collaboration and cross-pollination across projects and communities

Vendor neutral
Not-for-profit
Open governance
IP clarity

Harmonization, Interoperability

Increase efforts to harmonize AI/ML/DL open source projects and reduce fragmentation; increase interoperability among technical projects

Technical Advisory Council
ML Workflow Committee
Cross-Foundation Collab
Integration across projects

Trusted and Responsible AI

Become the home of open source trusted and responsible AI, both at the level of technical projects and also at the level of principles and guidelines

Trusted AI
Committee

Data, Models, Marketplace

Host open source models and provide supporting tools; publish best practices; offer a marketplace for AI/ML/DL models

Open source marketplace
Open source AI models

Funding and Awareness

Provide a funding model for key projects

Increase awareness via a number of marketing and outreach activities

Funding model
LF AI Days
LF AI Summits
Marketing services
PM services
Event services

Our mission

Build and support an open AI community, and drive open source innovation in the AI, ML and DL domains by enabling collaboration and the creation of new opportunities for all the members of the community

of LF AI hosted projects originated from China

Value Proposition to Projects

<https://lfai.foundation/blog/2019/10/10/a-guide-to-hosting-your-project-in-lf-ai/>

ML Workflow Committee

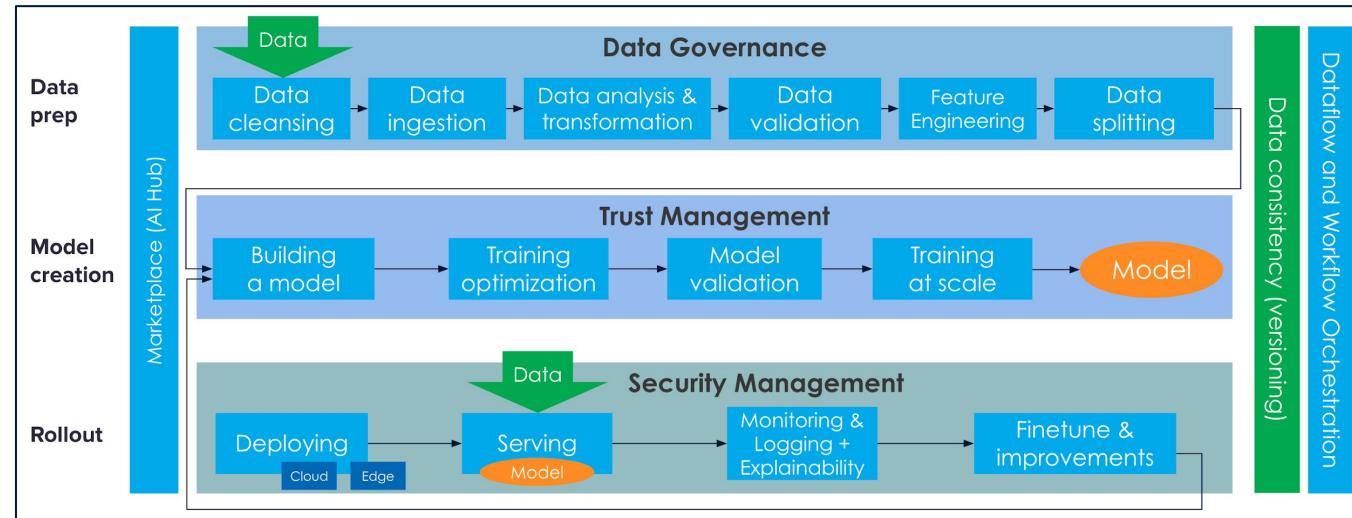

Participants

- › Amdocs
- › GOC
- › IBM
- › IFC
- › ITU
- › Orange
- › Seldon
- › Siomtics
- › SyLabs.io
- › TechM
- › Tencent
- › Verizon
- › WBG

Anyone can participate.

Scope

1. Provide a reference ML workflow architecture and implementation

2. Increase interoperability and integration across technical projects

Trusted AI Committee

Participants

- › Amdocs
- › ATT
- › Ericsson
- › ETL
- › Huawei
- › IBM
- › Orange
- › TechM
- › Tencent

Open to members.

Scope

1. Define policies, guidelines, tooling and use cases by industry to create responsible and trusted AI
2. Create a badging process for open source projects that meet the Trusted AI policies/guidelines as defined by LF AI

Two main efforts:

1. Principles: Define ethics, guidelines and principles for Trusted AI
2. Use Cases: Define and implement trusted AI use cases within different AI projects and industry domains

What have we done in 2019?

- Established LF AI as an umbrella foundation with all the required elements to operate efficiently and to scale
- Rebranded, gained visibility and recognition through a series of events, conferences talks, and dozens of talks delivered by active participants in LF AI and the ED (13 events)
- Welcomed 6 new projects including ONNX
- Re-engaged members in existing efforts; recruited new members
- Launched ML Workflow and Trusted AI that proved to be a great value ad

What are our plans for 2020?

- Increase collaboration across hosted projects towards an integrated stack
- Recruit projects to fill in the gaps (goal: implement an end-to-end workflow)
- Establish LF AI as major player in the Trusted AI space
 - Ethics is highly critical and there is a need for “neutral” set of tooling that will verify fairness, robustness, lineage and explainability of algorithms, models and data
- Grow membership to enable our mission in supporting, funding and sustaining critical open source AI projects
- Create value specific to target business challenges / domain specific

Call to action

1. Actively participate in: Board, Outreach, TAC, ML Workflow, Trusted AI, etc.
2. Nominate yourselves for leadership roles
3. Host your open source AI projects in LF AI
4. Help the foundation staff with its recruitment efforts
5. Contribute to hosted projects, support and adopt them
6. Participate in visibility and networking opportunities
7. Support collaboration across projects and umbrella foundations

2019 was a very productive year for LF AI thanks to your participation and support.

Thank you!
